broken arm; stopped breathing |

PROBLEM

Your patrol sees an accident on Olson Highway near Penn Avenue. The driver has been thrown from his car. Gas is leaking from the car.

Fire burned the back of his right hand - blisters

Right arm cut badly near elbow -- blood is spurting out.

Left arm is bent and swollen below shoulder -- may be broken.

He may not be breathing.

The fire is out, but it may start again. Treat the man so he can be moved quickly if necessary. (not necessary to make stretcher)
